

■ Transportation

All of our lead acid batteries are unregulated by DOT for transportation by truck, rail, ocean and air transportation because they meet the requirements of 49 CFR 173.159 (d).The only transportation requirements are:

1)The battery must be securely packaged in such a way to prevent the possibility of short circuiting.

2)The battery and the outer most packaging must be labeled "NONSPILLABLE" or "NONSPILLABLE BATTERY".All of our lead acid batteries are unregulated for air transportation because they meet the requirements of Special Provision- "A67" as promulgated by the International Air Transport Association(IATA) and the International Civil Aviation Organization(ICAO). They also meet the Vibration and Pressure Differential Tests of the International Maritime Dangerous Goods (IMDG) regulations.
